Congratulations and thank you for purchasing Comedy Movie Trailer and Titles!

A fun, chunky 3D text treatment perfect for your next comedy or family movie. The projects are set up in modular fashion so you could even use individual scenes as titles for a lighthearted corporate presentation.

No plugins are needed, the 3D text is created within After Effects.

The project contains a Movie Trailer sequence and a Title Sequence.

- -

What fonts do I need?

The FREE fonts used in the project can be downloaded here :

http://www.dafont.com/fishfingers.font
http://www.dafont.com/obelixpro.font
http://www.dafont.com/sf-movie-poster.font

- -

Where do I start?

Go straight to the folder '_Edit These'. Then add your content as follows :

- -

If you're making a Movie Trailer

Edit your **main text** using the compositions contained in the folder :

_Edit These / Trailer / Text Spots

If you have some, add your **voice-over** to these compositions.

enchant*d
studios

Edit your **main title screen** using the compositions :

_Edit These / Main Title Text BOLD, *and*
_Edit These / Main Title Text LIGHT

Note that there are BOLD and LIGHT placeholders which refer to the 'BOLD' 3D text and the 'LIGHT' 2D smaller sub-text, respectively.

If you have some, add your **voice-over** to this composition.

Edit your **critics' quotes** using the compositions contained in the folder :

_Edit These / Trailer / Critics Quotes

If you have some, add your **voice-over** to these compositions.

Edit the **additional slides** (MPAA Notice, Production Company, Coming Soon, End Credit Block) using the compositions contained in the folder :

_Edit These / Trailer / Additional Slides

Add your **movie clips** into the compositions contained in the folder :

_Edit These / Trailer / Movie Clips

There's a handy folder here to import your source footage.

Add your **music** to the composition :

_Edit These / Music and Voice / Audio Jungle Music – if using the preview music, *or*
_Edit These / Music and Voice / Edited Music / Music - Trailer – if using different music

To change the **bold text colour** go to the render composition :

_Render These / Comedy Trailer

Select the '**Trailer Scene...**' layers. Each layer has a Hue/Saturation adjustment **effect**.

If you're making a Title Sequence

Edit your **main text** using the compositions contained in the folder :

_Edit These / Title Sequence / Text Spots

Note that there are BOLD and LIGHT placeholders which refer to the 'BOLD' 3D text and the 'LIGHT' 2D smaller sub-text, respectively.

Edit your **main title screen** using the composition :

_Edit These / Main Title Text BOLD

Add your **music** to the composition :

_Edit These / Music and Voice / Audio Jungle Music – if using the preview music, *or*
_Edit These / Music and Voice / Edited Music / Music - Titles – if using different music

To change the **bold text colour** go to the render composition :

_Render These / Comedy Title Sequence

Select the '**Titles Scene...**' layers. Each layer has a Hue/Saturation adjustment **effect**.

- -

Rendering

To render simply find the appropriate composition :

_Render These / **Comedy Trailer**, or
_Render These / **Comedy Title Sequence**

Place it into your render queue and choose your desired output specifications.

- -

Thanks for purchasing, enjoy!
