

## Slides – After Effects Template

# 01 // User Guide

### **Thank you for purchasing Slides!**

A split screen effect template for your photo or video slideshow. This project is fully modular so you can adjust each slide length easily, allowing for longer durations of images or footage.

Text is fully editable too – simply choose your own font size, position and colour.

There are no extra plugins required and the project renders very quickly.

Just drop in your images, edit the text and you'll have a perfect slideshow ready in minutes!

The font used in the preview is Montserrat - <http://www.fontsquirrel.com/fonts/montserrat>

Slides – After Effects Template

# 02 // Editing Text

In the Project panel open the folder **01. Edit Comps / Text**

In here are all the editable text compositions for the project. Open each one individually and edit the text, using the entire composition area if necessary.

Slides – After Effects Template

# 03 // Adding Media

In the Project panel open the folder **01. Edit Comps / Images**

In here are all the editable image/footage compositions for the project. Open each one individually and add your media. You can choose to use still images, video footage – or even a mixture of both.

Please ensure that there is a least 6 seconds of media on the timeline.

**Slides** – After Effects Template

# 04 // Changing Colors

There is no global color adjustment on this template.

Please change the text color when you are editing the text.

Slides – After Effects Template

# 05 // Rendering

To render simply drop the composition **02. Final Comp / Final Comp** into the Render Queue and choose your desired output settings.

Hit render !
